## Maintenance and Service Aids

# **Technical Data Sheet**

Page 1

# **EADP/EADPI**Air Duster Plus

EADP and EADPI are non-flammable products designed for the safe removal of dust and airborne contamination from very delicate or inaccessible areas of electrical and electronic equipment. They are high-powered versions of the standard range; EADP is the high powered version of EAD. For hard to reach areas, EADPI is a high-powered invertible airduster, which is particularly useful for very intricate equipment or items which cannot be moved for cleaning or maintenance.

- Ultra high power, inert, pure compressed gas for dust removal
- High pressure blast for removing stubborn deposits
- High power (EADP) or high power invertible (EADPI) versions available
- Non-flammable propellant

#### **Typical Properties**

 $\begin{array}{lll} \mbox{Colour} & \mbox{Colourless} \\ \mbox{Flash Point (°C)} & \mbox{None} \\ \mbox{Boiling Point (°C)} & -26.2 \\ \mbox{GWP (vs. CO}_2, 100 \mbox{yr ITH)} & < 1 \\ \end{array}$ 

<u>Description</u>	<u>Packaging</u>	Order Code	Shelf Life
High Powered Airduster	400ml Aerosol	EADP400D	48 months
High Powered Invertible Airduster	200ml Aerosol	EADPI200D	48 months

#### **Directions for Use**

EADP should be used in a vertical position or at an angle of not greater than 60° to the vertical otherwise a freezing effect will result. If it is necessary to tilt the aerosol more than this, use the invertible version, EADPI.

Caution: Do not use EADP/EADPI for prolonged blasts as the surface of the can will form frost.
